AUTOMOTIVE PROGRAMMING KIT

Simplicity, power
and extraordinary features

COMPACT, PRACTICAL AND COMPLETE

The **Automotive Programming Kit** allows you to carry out the diagnostic and programming processes of keys / transponders, proximity keys, and car remote controls from the main automotive manufacturers.

EXCLUSIVE FUNCTIONS

The only kit on the market that, to date, allows you to:

Perform the programming of:

- Renault® Clio 5
- Renault® New Zoe
- Renault® Arcana
- Nissan® Qashqai J12
- Nissan® Aria full electric
- Fiat® Panda 2022 with new ECU
- Fiat® Panda 169 with precoding via OBD

Carry out the diagnostic procedures of the **FCA® group** connecting, directly to the line vehicle CAN, without having to disconnect any module of the car's electronics.

Reset the ECU

through a local backup should the diagnostic procedure become discontinued on Renault®, Nissan®, Dacia® cars, Opel®, BMW® and PSA®.

WHAT IT CONTAINS:

- PRE-CONFIGURED WINDOWS TABLET
- STAK
- TOYOTA® / FCA® / RENAULT® PROGRAMMING CABLE
- 884 DECRYPTOR MINI
- UNIVERSAL REMOTE CONTROL: MAVIK
- FLIP KEYS AND KEY BLADES
- HARD PLASTIC CASE

User-friendly software interface

The **Keyline Cloning Tool** programming software contains all the information needed to perform the pre-coding operations (with the 884 Decryptor Mini device) and programming of the vehicle key. The location of the car's OBD port is indicated by the software in the course of the guided procedure.

Dedicated assistance

Through a dedicated chat on the **Keyline Cloning Tool** software (used to program keys), the user can request support directly from Keyline's specialized technicians*.
